TO REDUCE PRICES. ney in Our Own

Already the administration is preparing for action to reduce prices, if negotiations with manufacturers fail to produce results. Robert S. Lovett of the war board, who made public the statement, declared the government was ready for such a contingency, and fest confident it could meet the situation. If possible, he said, it hoped to achieve results without resort to legislation. In the Senate today, Senator Pomerene introduced a bill to authorise the President to fix the prices of iron ore, iron, steel, and their products, and to regulate their production and sale through the Federal Trade Commission. Full power to control the sale and distribution of foods, feeds and fuel was given to the government today in the final passage of the food control bill.

FOR SANE-PRICES.

FOR SANE-PRICES.

The administration attitude in demanding that American manufacturers sall to the Allies at the same prices as to this government is that, since there is a common purpose, and since the Allies are buying their supplies with American money, justice requires that costs be equalized. Two restrictions, however, will be enforced in selling to the Allies. One is that the allies themselves must apply the same rule in selling to each other, and to the United States, and the other is that the arrangement must be limited to articles actually used for war purposes. Officials hold that the last restriction is necessary as a protection to American industry, and intend that no raw materials shall be sold abroad at low prices to be made up into manufactured goods sold back to the United States in competition with American dealers.

Who have opposed the bill, senator Reed, its leading opponent, declared that he would rather resign his seat than give any aid to the ensmy.

Referring to the question of peace, Senator Reed said that the less talk on that subject now the better.

Benator Reed asserted that his opposition to the bill could not be construed as disloyalty, but represented his judgment that it would weaken the United States in the war.

The vote was 66 to 7.

The House passed the measure June 22, 365 to 5, after a week's debate. Opposition led by Senator Reed and others and the fight over the prohibition provisions delayed the Senate vote, 31 to 6, until July 21. Further conference requiring a week, during which the President caused elimination of Senate amendments for a food board of threemembers and a Congressional committee to supervise war expanditures.

The first food measure, for a survey and stimulation of production, also was contested sharply in the Senate. It was passed on May 28 by the House and on June 2 by the Senate. It was then held in conference to await the Senate's action on the control measure.

Both bills are to become laws on Priday, with President Wilson's approval. Senate and House leaders tonight made plans to that end, the delay being caused by adjournment of the House until Friday and necessity for the signing of the bills in open session by the presiding of feers of both houses. The Senate recessed tonight until Friday, so that after Speaker Clark signs the bill on reconvening of the House

bill on reconvening of the House it may then be signed by the Sen-ate's presiding officer and immedi-ately sent to the White House. Trousers for women are suggested in HOOVER'S JOB.

Prompt appointment of Herbert Hoover as food administrator and immediate operation under the legislation is expected to follow. In addition to its comprehensive provisions for control of food, fuel, fertilizer and farm equipment, the control bill carries drastic prohibition features. Thirty days after it is approved it will be unlawful to use foodstuffs in the manufacture of distilled beverages or to import distilled spirits for beverage purposes; and the President will be empowered to commandeer for military purposes distilled liquors now held in bond and to regulate or restrict the use of foods in the manufacture of wine and beer.

THE FINAL VOTE.

The final vote in the Senate was secured by unanimous agreement to dispose of the bill late today, and after four days' discussion of the conference report. In addition to the seven Senators voting against the bill Senator Gore, chairman of the Senate Agriculture Committee. THE GREAT WAR. The Situation to Date: Near the coast of Flande the British have been successful in raid on the German lines. the bill Senator Gore, chairman of the Senate Agriculture Committee, and Senator Sherman, Republican, were paired and did not vote. Both announced that, had they been at liberty to vote, they would have been registered in the negative. Of the absent and paired Senators announcement was made in behalf The German Crown Prince has no followed up his attacks on the Aisnfront, where he was recently repulsed in Central Moldavia the German

announcement was made in behalf of virtually all that they favored the final draft.

Contrary to expectations, no mo-tion to recommit the bill with in-structions or other parliamentary objections were offered before the

vote.

The Senate's action virtually concludes work of Congress on the administration food legislative programme initiated last May. It puts into the President's hands for personal use or delegation the most unusual and comprehensive powers, and, according to many members of the Congress, marks the innovation of a national socialistic experiment.

deliverance of the Austrian crownland of Bukowina. The Austrian
Emperor addeq:
"May the Lord continue to aid in
faithful co-operation in the future
with the fullness of His blessings."
Emperor William replied that the
joy of the people of Bukowina would
be echoed in Germany and he added
his prayers that God would help the
Teutonic allied troops in the future.
Gen. Von Koewsa, who commanded the Austrian forces in Bukowina,
has been appointed a field marshal
by Emperor Charles.

SECOND PRINCETONIAN

PARIS, Aug. 8.—John Verplanck
Newlin of Whitford, Pa., an American field service member who was
seriously wounded by a shell at his
post August 3. died in a hospital at
the front on August 5.

Newlin, according to the Paris
edition of the New York Herald,
was a member of Section 29 and left,
Paris less than a month ago. He
was a Princeton student and was
the second man from that university
to be killed in field service within
the last week.

The same shell which struck Newin wounded Julian Broome L. Allen
of New York, the section's leader.
The latter is the son of Frederick
Allen.

government fixing of fuel prices.
The Federal Trade Commissi

Bituminous prices to the general public were fixed at \$3 in a recent agreement between producers, members of the commission and other government officials. This price was to hold until a final price was determined on. Investigation has convinced members of the commission that this price is too high and that coal can be sold at a finich lower figure and still leave a handsome profit for the producer.

AGAIN CLOSES SHOP.

In October, Cananea again closed shop and started across country for American protection, while Villa repuised at Agua Prieta, opposite Douglas, passed on to take Cananes and Nace, For several weeks 5000 tillistas were quartered at Cananea, largely at the expense of the company. Calles and Obregon followed on to Nogales, then southward and eastward, as Villa was driven back to his stamping grounds in Chihushus. Since that time, with short intermissions, Calles has controlled this locality and the greater part of the State. His forces marched back into Cananea early in December, 1915. International compilications of grave sort caused the next stoppage, in June, 1916. After four weeks the Americans came back and the plant was operated continuously for eleven months, till the final closing a couple of months ago.

Latterly, the Cananea Company had been laying golden eggs for Sonora. It was maintaining a camp of 17,000 people, employing 4500 Mexicans, at 24 a day, silver, and only 200 Americans. The company here was paying out about 1,000,000 peops a month, more than half of it in wages, with a bullion tax on exports of 270,000 peops and other taxes that amounted to at least 100,000 peops.

THE EXACTIONS.

There had materialized a multitude of irritating exactions, proceeding both from the government and
the workmen. There had been established, under Gov. De la Huerta,
a workmen's council, the Camera de
Obreros, at Hermosilio. This commission was assumed to be merely
advisory to the Governor. Instead,
it seized upon judicial and executivi
functions. Usually it supported any
complaining workman in any demand he might make and some of
its rullings, particularly one affecting the Calumet & Sonora Mining
Company, were declared absolutely
unsupported by right or law.

Take a look at the new Willys Siz.

Then get the "feel" of this new car and note its remarkable performance.

Compare it in every way with cars that cost from \$300 to \$400 more.

Then you'll get a real tangible idea of the amazing value we can put into this Six because of the economies of our larger production,—larger than anyone building a similar car.

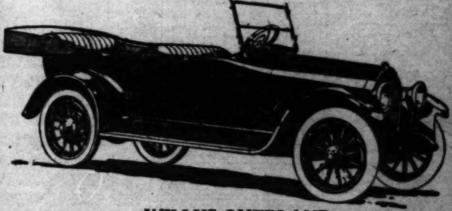

Note the smart new body design—the double cowl body—alanting windshield—long racy lines—a perfect beauty!

The superior performance of the new Willys Six is due to a new scientifically attained balance between great power and sturdy light weight.

It makes the Willys Six a livelier, snappler car and 'easier to handle.

There's nothing to compare it with until you come to cars costing \$300 to \$400 more—even then you must take into consideration the superior Willys Six performance.

SOLDIER ATHLETES ARE NEVER IDLE.

Army and Navy units quartered at San Diego are reported by J. R. Klawana, just returned from a week's trip to the southern end of the State.

Two ball clubs formed by the Coast Artillery units at the exposition grounds, two nines organized by two companies of the Twenty-first Infantry, and three feams to be organized by the Naval Reserves constitute a formidable collection of diamond talent, the Spalding man relates.

ONE-QUARTER OF ALL DRAFT EXEMPTION PLEAS REFUSED.

G EORGE DENIS, chair-man of city district No. 17, last night announced that his board will today post that his board will today post the names of seventeen men who failed to appear for ex-amination last Monday, as listed for military service. Their names will be handed to the Federal District Attorney with a request that the men be rounded up. men be rounded up.

Six exemption boards considered pleas for exemption from army service for the first time yesterday. Out of sixty-three cases presented, thirty-nine were allowed, seven held for further consideration and seven-teen—a little less than one-fourth—refused outright.

Eleven claims for exemption were acted on last night by district No.

Eleven claims for exemption were acted on last night by district No. 17. Six were denied, two were granted and three held for further investigation. Those whose claims were denied are Howard B. that married men without dependent children should not be exempticed. Men who claimed exemption for the support of widowed mothers were denied on the theory that a man can support a mother on \$25 per month and, as his pay is \$30, if he really desires to care for his mother he can send her that amount. The same is true of dependent wives. The cases suspend-

ed were all on the ground that the affidavits filed were not sufficient to support claims made.

torney of Vernon since the time that municipality was incorporated, tendered his resignation to the Board of Trustees at a meeting Monday. Action thereon war postponed to a meeting to be called by the chair.

At the same time, numerous and sunday beer bottles, the floisam and jetaam of a hard Sunday, lined the streets of Vernon and one even jerched at the front door of the City Hall. Therefore the Trustees rescinded an ordinance whereby Jack Doyle's widely-known beer garden had been closed. It was declared the effect of the closing had been to drive the overflow from Doyle's bar into the street, most of the overflow being laden with foaming beer bottles.

KERENSKY.

Stunned and sobered by reverses suffered on the southwestern front, the men at the head of the Russian government have stopped chasing after Socialistic Utopias and are making an effort to bring order out of chaos and to give to the armies in the field the firm support behind the lines that is necessary if Russian autonomy is to be preserved. Alexander P. Kerensky has withdrawn his reeignation as Premier and retains that place with added powers that make him as absolute a dictator as was the Caar whom he replaces. He has renounced most of his former Socialistic ideals, cut away from his inflammatory associates and is striving to re-estalish a rule that bristles with Cossacks and smells of blood and Russian leather.

Kerensky is halled as the man of the hour in Russia. He possesses the confidence of the proletariat and occupies a position where he can select as his advisers and associates men of mature years who are versed in the arts of government. Among his present ministers are men who served under the old regime. He has bluntly told the Russian extremists that he desires to establish a stable government with experienced men holding responsible positions; that the time for mythmaking and experimentation has passed. His first measure to the Russian people reminds one of a sign displayed in a noted gambling hall in Dutch Flat during the early mining days. "If you want to know who's boss here, start something."

Coming from the outside, Kerensky has fought his way to the top. In this struggle he did not hesitate to make use of the tools at hand. This may account for his Socialistic utterances during the early part of his political career. As he was not of aristocratic birth, his only chance to risa in Russia lay in casting his lot with the Social democrats. If they won, he would win with them; if they lost, he had little to lose. Emile Paguet, the French political economist, summed up concisely the condition which Kerensky faced when he wrote:

The proletarist chooses its legislators because they are

heads who came here in the first place seeking business, but the facilities they have provided for transportation have not been changed to meet really modern re-

have provided for transportation have not been changed to meet really modern requirementa. Nor are the rallways themselves entirely to blame for this condition. Los Angeles until recent years has been all too occupied with its own phenomenal development to pay as much heed as it might have to the necessary planning and regulation of its shipping facilities.

The hearing of the whole local traffic situation before the responsible authorities in charge of railway regulation in California is well calculated to bring both the railways and the people of Los Angeles to their senses. It is a mistake to talle in ewesping terms of forcing the railways leads do not attempt to deny any longer that the grade-crossing situation in Los Angeles needs remedying. The railways have many harassing troubles to contend with, what with the ever-growing competition of the fitney bus, the touring automobiles and the freighting truck, not to mention the meddling in all their affairs of the ever-obstreperous politicians, and The Times would be the last to suggest unreasonable treatment of these carriers. Granting that the railways have too long had the freedom of the city in the laying of their tracks, it does not follow that they should not have something to say in the discussion of plans fer undoing the damage which has been done. The thing would not have gone as far as it has had the public been awake, and it were much better all around it there could be something like agreement between the railways on the one hand and the community at large on the other when a solution is finally arrived at. Let us be

between the railways on the one hand and the community at large on the other when a solution is finally arrived at. Let us be fair and just with the railroads.

There is one thing the community must hold out for from first to last and that is a plan which will leave the way clear for future lines to enter the city. On that question there should be no compromise. If the Southern Pacific and Salt Lake are, as is charged, attempting to put over an arrangement which will leave them in con-

trol of all the feasible means of ingress into the city, their announced plan for a common terminal at the Areade depot site should be stamped upon. More will be heard of this scheme when the railway hearing is again in full swing, however, and final judgment should be withheld.

To date the only plan suggested that appears logical and fair, not only to existing find future railways but to the public, is that of stopping all lines short in the Plana district, letting them swing in out of the river routes into a great union station. It is difficult to see how any other plan could possibly meet all the conditions that arise as this one undoubtedly would, but that will be something for the State Railway. Commission to ascertain by exhaustive investigation.

have depots that ought long ago to have been replaced with modern structures and the third has a station which, although new, does not represent any great investment as depot investments go in large cities. It will be a comparatively simple metter to pick up the local roads and set them down in a common terminal. At least it will be simple compared with what has been done and is being done in other cities. The question of whether the Pacific Electric lines should use the proposed steam raifway terminal need not agitate the community. The Pacific Electric has already gone a long way toward carrying out a plan designed to facilitate its own interurban service and at the same time to wipe out its grade crossings, and this project would not interter with the union-terminal plan for the steam roads. Altogether, conditions are highly favorable at this moment for settling the traffic problems of Los Angeles for all time to come.

And The Times repeats—give the railroads and their chiefs credit for all their good work and good intentions. God knows that, with strikers and litneys and automobiles and damage suits and losses and popular prejudices to deal with, they have troubles enough. Certainly they ought to have something to say about their own terminals.

The spectacle of American troops spending money like prodigals in Paris must be

The speciacle of American troops spending money like prodigals in Paris must be rather discouraging to the poor French pollus who receive a mere pittance. It is a question whether the Americans are doing the proper thing under the circumstances. It goes far to prove the claim of our enemies that we have nothing but money.

The ocean of democracy is still advancing all over the world. And this in spite of the imperial Mrs. Partingtons trying desperately with their brooms to aweep it back.

It is suggested that the sirplanes be known as the flab-hawks of the war from the fact that an observer from an altitude can see far into the water below.

where we come in; that it a research way this is an American war.

Panama Ne Less Than Suez.

The Panama Canal is exclusively under American control and it is defended with American cannon. No one can conceive of the Germany that took Alsace-Lorraine and invaded Belgium—once Germany became an American power by virtue of the possession of French and Eritish naval stations and islands in this part of the world—no one can conceive of that nort of a Germany remaining content very long with a Panama Canal exclusively under the domination of the United States. There is a formula very familiar in German frontiers would not be confined to Europa. The German frontier would not be confined to Europa. The German frontier would be wherever on the earth there was a German naval base, or insular fortrees or commercial outpost. And thus the "rectification" of German frontiers would soon involve the "safeguarding" of German commercial and imperial interests at the strategic points in the great interoceanic waterways—Panama no less than Suez.

ls difficult to see how any other plan could possibly meet all the conditions that arise as this one undoubtedly would, but that will be something for the State Railway. Commission to ascertain by exhaustive investigation.

The way is clear in Los Angeles for a real readjustment of traffic conditions, and the city is fortunate in having the whole situation up for a hearing before an authorized body that has pledged itself to take some definite action. None of the railways coming to Los Angeles have made investments in buildings at all comparable with the amounts of money spent on depots in other cities the size of this. Tens of millions have been spent in some cities in rearranging traffic facilities on account of the necessity for tearing down costly buildings and wiping out valuable property needed for rights of way and other uses.

Two of the lines entering Los Angeles have depots that ought long ago to have been replaced with modern structures and the third has a station which, although United States by sinking its ships

The President in his addresses has made this thoroughly clear and he has also interpreted the war, from the American viewpoint, so that the most idealistic believer in democracy and human liberty could give it moral and material support. It is but common sense to fight our enemy in Europe rather than fight him here; and fighting him 2000 miles away does not make it any less an American war, it is necessary for some of us even now to grasp the fact that this is a war of a deep, cataclysmic character which cannot leave the world as it was three years ago on the eve of the Kaiser's brusque ultimatum and that, being in it. Americans would be more than stupid and craven if they did not mightily resolve that the outcome should not be shaped by the political and imperial conceptions of a reigning Prussian prince whose ideals of government have never been shaken free from the medievalism of his royal ancestors.

Doubtful Compliment.

[Topeka State Journal:] A number of others with literary aspirations had assembled at a dinner. Two minor poets became engaged in conversation.

"I saw your spring poem in the Wonder Magazine," said one.

"Did you?" questioned the other, becoming suddenly animated.

"Tes, and I heard rather a neat compliment passed on it by a young woman."

"What did she say?"

"She wanted to know if I had written it."

By all means bar the women! If the women wake up they may bar the cafes—they can play the boycott game as well as strikers. A few cafes out of business, with their liceuses, taxes, and, let us say "perquisites," cut off the pay rolls of the city and the city employees, might make us a little pourer; but we'd be so very proper and moral, and our brainy business women who coessionally spend an evening out at the theaters, or wherever they choose, and take a little retreatment afterwards, in the enjoyment of living in this day and land of boasted freedom and liberty, that men SAY we're fighting for, will find it necessary to annex some little cigaretts chewing tag of respectability that, if you please, WEARS PANTS.

FUMIGATING COST

MENTONE, Aug. 8.—The cost of

MENTONE, Aug. 8.—The cost of fumigating to the orange growers will be increased 1 cent a tree this season because of the increased cost of cyanide, according to H. Paine of a local fumigating company. This company today placed four fumigating gangs in the field to carry on the work of killing citrus scale.

The company now has two cars of cyanide on hand and a promise of plenty more, but it is costing more this year than ever before. Many of the groves in the Redlands district have been examined, and, while a good percentage of the scale was killed by the heat wave, a large part of the groves will be fumigated to kill the scale that has hatched since then.

In some of the groves that had just been pruned practically all the scale was cooked by the hot sun.

Then some members of the board called on Mr. Williams and asked that he recommend Attorney Harry Chamberlin, State Senator, for the job of City Attorney for Version. Mr. Williams wrote a new resignation, incorporating in it a recommendation of Mr. Chamberlin. Then he forced the resignation matter before the Trustees Monday.

It is said opposition to the acceptance of the resignation has developed in unexpected quarters and gossip has it that if the tender is accepted, something approaching a scandal will develop in the manufacturing suburb. Abuse of the Returned Goods System is Scored. Advertising Club Champion

the Market Basket. Co-operation with Merchants a Patriotic Duty.

The Women's Advertising Club o adopt the habit of carrying market baskets and shopping bags and to carry small parcels with them.

New York City Merchants pay \$8,000,000 annually to extend the courtesy of returned goods to an unthinking public. One store estimates that 20 per cent. of its total purchases are returned—sometimes in good shape, more often in unfit condition to put on the tables or shelles again. Another store found it was paying more every year to clean returned goods than it paid in yearly rent.

It is not the intention of local merchants to withdraw the privilege, but they are trying to work in conjunction with the economy board of the National Council of Defense in eradicating this needless waste as part of the effort Uncle Sam is waging to incuicate thrift and economy in the minds of the American public.

The resolutions follow, in part: Whereas, the elimination of waste and the conservation of time, labor, men and money will be the deciding factor for victory in the present world war, we, as business women, desire to aid the merchains of our city in so far as possible to put into effect such methods of economy as they, acting in conjunction with the commercial economy board of the Council of National Defense, may deem advisable and most effective.

Therefore, be it resolved that we,
